Quito, Ecuador's capital, is currently seeing its first tall luxury residential buildings rise, designed by some of world's most-renowned architects. Yoo Quito (pictured here) by architecture firm Arquitectonica and designer Philippe Starck was one of the first. The urban shift in Quito started with a relocation. In February 2013, the municipal government moved the entirety of Quito's 1960 Mariscal Sucre International Airport from the dense residential and commercial neighborhood that had grown around it to an agricultural area 12 miles away. The latter takes a more historic approach to its materials: It will be constructed of concrete dyed in various shades of pink to reflect Quito's terra-cotta heritage. Explore Quito holidays and discover the best time and places to visit. | A capital city high in the Andes, Quito is dramatically situated, squeezed between mountain peaks whose greenery is concealed by the afternoon mist. Modern apartment buildings and modest concrete homes creep partway up the slopes, and busy commercial thoroughfares lined with shops and choked with traffic turn into peaceful neighborhoods on Sundays. To sample some of Quito's most authentic and traditional cooking, head to this attractive park in La Floresta where every evening food stalls are set up selling freshly prepared tripa mishqui (grilled cow intestines), seco de pollo (chicken stew), empanadas and morocho (a kind of spiced corn porridge). Apartment La Floresta Suite is located at Valladolid in Quito in 3.6 km from the centre. La Floresta Suite description of features and services. A private parking lot on the territory is offered to all the car owners. You can pay for the accommodation and services only in cash. Our website offers booking Apartment La Floresta Suite at a profit. Here you can count on minimal prices and profitable conditions. Please select check-in/check-out dates to see rates and availability. The historic center of Quito has one of the largest, least-altered and best-preserved historic centers in the Americas, and is undoubtedly one of the cities main tourist attractions. Quito, along with Kraków, were the first World Cultural Heritage Sites declared by UNESCO in 1978. The central square of Quito is located about 25 km south of the equator; the city itself extends to within about 1 km of zero latitude. I present you Quito, the capital of Ecuador.
