IFIP International Conference on Distributed Systems Platforms and Open Distributed Processing. Editors. (view affiliations). Welcome to Middleware'98 and to one of England's most beautiful regions. In recent years the distributed systems community has witnessed a growth in the number of conferences, leading to difficulties in tracking the literature and a consequent loss of awareness of work done by others in this important field. The aim of Middleware'98 is to synthesise many of the smaller workshops and conferences in this area, bringing together research communities which were becoming fragmented. The conference has been designed to maximise the experience for attendees.
