Introduction

This report lists publications produced by faculty and staff in the Department of Applied Economics and Management at Cornell University from January 1999 through December 1999. Publications are prepared under several subject matter categories, which is illustrative of the department faculty's diverse interests. Subject matter categories include:

Farm business analysis	Food industry management and markets
Income tax management	Community development
Farm transition planning	Economic development
Human resource management	Ag and the environment
Farm labor policy and regulations	Farmland protection
Finance	Environmental and resource economics
Dairy markets and policy	International development
Horticultural product markets	International trade
Cooperative enterprise	Applied economics and analytical methods
Agricultural and food policy	

At the back of this bulletin, publications are indexed by author and subject matter category for ease in identifying articles of interest to the reader.

To obtain single copies of most bulletins published in the department's EB (Extension Bulletin), RB (Research Bulletin), SP (Staff Paper) and WP (Working Paper) series, requests may be sent to:

A pressing question for climate change adaptation is whether ongoing transformations of the agricultural sector affect its ability to cope with climatic variations. We examine this question in the United States, where major increases in productivity have fueled most of ag December 2013 Kristen S. Park Charles H.
