The COVID-19 Related Research Grants support education research projects that will contribute to understanding the rapid shifts in education. While graduate students may be part of the research team, they may not be named the PI or Co-PI on the proposal. The PI must be affiliated with a non-profit organization that is willing to serve as the administering organization if the grant is awarded. The Spencer Foundation does not award grants directly to individuals. Examples include non-profit colleges, universities, school districts, and research facilities, as well as other non-profit organizations with a 501(c)(3) determination from the IRS. @article{LopezBerestein2000Volume1A, title={Volume 19 Author Index Part 2}, author={Lopez-Berestein and J. 2791 and Lutz and 1710 and Machida and M. 1698 and Markowitz and N. 5464 and Mazo and D.
