Speech-language therapy is the treatment for most kids with speech and/or language disorders. What Are Speech Disorders? A speech disorder refers to a problem with making sounds. In speech-language therapy, an SLP works with a child one-on-one, in a small group, or in a classroom to overcome problems. Therapists use a variety of strategies, including: Language intervention activities: The SLP will interact with a child by playing and talking, using pictures, books, objects, or ongoing events to stimulate language development. State associations for speech-language pathology and audiology also keep listings of licensed and certified therapists. Your child's SLP should be licensed in your state and have experience working with kids and your child's specific disorder. Speech-language pathology is a field of expertise practiced by a clinician known as a speech-language pathologist (SLP) or a speech and language therapist, both of whom may be known by the shortened description, speech therapist. Speech-language pathology is considered a "related health profession" or "allied health profession" along with audiology, optometry, occupational therapy, rehabilitation psychology, physical therapy, behavior analysis and others.
