

Researching Geography: The Indian context; 9781315439068; 2016; 286 pages; Routledge, 2016; Gopal Krishan, Nina Singh

geographers. Geography in India is one of the rare examples of an established discipline in which little attention is paid to the teaching of disciplinary structure i.e. philosophical and methodological base. Mukerji's statement in this context is worth mentioning "Indian geography is suffering from malnutrition created by the lack of field work. It is marginal, weak and sometimes non-existent". Doing Gender, Doing Geography. Emerging Research in India. Editors Saraswati Raju Kuntala Lahiri-Dutt. London New York New Delhi. Indian geographers have also engaged with studying gender through their disciplinary lens; a growing body of writings on gender is thus being produced. However, much of Indian geographical research has followed proven areas of research through orthodox methodologies in order to carve out hitherto unwelcome niches without destabilising the established order. Also, often in Indian context a "feminist" tag bears a negative connotation that many scholars do not want to possess even as what they do can be included essentially within the subject matter of feminist geography. xiv J Doing Gender, Doing Geography. This book is a one-stop comprehensive guide to geographical inquiry. The volume traces the step-by-step account of the whys and the hows of research methodology. Gopal Krishan is Professor Emeritus in the Department of Geography at Panjab University, Chandigarh, and National Fellow of the Indian Council of Social Science Research (ICSSR), New Delhi, India. Nina Singh is Professor of Geography and Dean of the Faculty of Social Sciences at Maharshi Dayanand University, Rohtak, Haryana, India. Related Subjects. Asian Studies.
