Pop-ups employ various folding devices that cause figures to lift, pop up, rise and unfold, or unfold and extend when a page is opened. Despite changes in technologies, materials, and mechanisms, contemporary books, like their predecessors, are still assembled by hand and share some of the same construction principles. And although we may associate pop-ups and movable books with children, adults were the original audience for what was anything but children's play. Moving from a static printed page to a three-dimensional mechanical book changes the dynamic between reader, words, and illustrations. The relationship becomes more interactive, more tactile, and, well, more dynamic. We depend on our senses to absorb and process information.
