No customer reviews. 5 star (0%). He has conducted extensive studies about the association between primary care and health outcomes, particularly on the role of primary care in mediating the adverse impact of income inequality on health outcomes. Dr. Shi is also one of the developers of the Johns Hopkins Primary Care Assessment Tools that have been widely used internationally to measure primary health care performance at the individual, practice, and system levels. Dr. Shi has consulted extensively for hospitals, health care systems, and international agencies.Â He was awarded the long-term care research award by the Foundation of American College of Health Care Administrators in 1995.
