Environmental law is the collection of laws, regulations, agreements and common law that governs how humans interact with their environment. The purpose of environmental law is to protect the environment and create rules for how people can use natural resources. For lawyers who have personal goals to influence environmental policies, the area of law can provide that opportunity. When the law and the environment intersect. Environmental lawyers grapple with whether and how lawmakers should regulate the environment. When those decisions are made, lawyers help their clients implement regulations in the best ways possible.

Environmental Policy and Law (EPL) is an international, interdisciplinary journal that facilitates an understanding of environmental policy and law issues not only by drawing upon and contributing to the environmental social sciences, but also linking the health, natural, and computer sciences. The aim of the journal is to promote communication among academia, government, business and industry, and non-governmental organizations who are instrumental in the solving of environmental problems. Marlene Jahnke, Former Editor of Environmental Policy and Law, Bangor, UK. Mireille Jardin, UNESCO, Ecological Sciences for Sustainable Development, Paris, France. Eduardo Astorga Jorquera, University of Alicante, San Vicente del Raspeig, Spain. Environmental laws and regulations represent the minimum environmental standards or practices acceptable to society. Put another way, they reflect the maximum environmental price society is willing to pay for the benefits provided by various enterprises. If top management at an enterprise is not prepared to go along with the environmental standards of the society that provides its inputs, purchases its outputs, and is home to its facilities and employees, why bother with an EMS? An environmental policy would be meaningless unless it included a commitment to comply with environmental laws and r
