Protides of the Biological Fluids: Proceedings of the Colloquium on Protides of the Biological Fluids, 27th, Brussels, Apr. 30 - May 3, 1979. by H. Peeters (Editor), Colloquium on Protides of the Biological. Protides of the Biological Fluids contains the proceedings of the 23rd Colloquium on "Protides of the Biological Fluids" held in Brugge, Belgium in 1975. The discussions were organized around three themes: proteinase inhibitors, clinical evaluation of plasma protein patterns, and affinity chromatography. Comprised of 117 chapters, this volume begins with an overview of carcinofetal proteins, followed by an analysis of proteinase inhibition. The book also explores the structure and function of animal proteinase inhibitors as well as techniques and methods used in clinical evaluation of plasma protein patterns. This monograph will be of interest to biologists and research workers in biology. Save for LaterSave Protides of the Biological Fluids: Proceedings of the Thirty-Third Colloquium, 1985 For Later. Create a List. Download to App. An International Review Series Devoted to Proteins and Related Studies, Volume 33: Protides of the Biological Fluids documents the proceedings of the 33rd Colloquium held in 1985. This book is divided into three sections. Section A focuses on the plasma protein genes that includes the location of genes on the chromosome, pathology and variance of several genes, and gene expression. The proteins of the nucleus and detection of antibodies, such as antinuclear antibodies (ANA), to nuclear constituents are deliberated in Section B. Section C is devoted to the technical advances in the field of pro
