The War on Science: Who's Waging It, Why It Matters, What We Can Do About It by Shawn Lawrence Otto 2016 | ISBN: 1571313532 | English | 514 pages | EPUB | 1 MB. At the very time we need them most, scientists and the idea of objective knowledge are being bombarded by a vast, well-funded, three-part war on science: the identity politics war on science, the ideological war on science, and the industrial war on science. Shawn Lawrence Otto's provocative new book investigates the historical, social, philosophical, political, and emotional reasons for why and how evidence-based politics are in decline and authoritarian politics are once again on the rise, and offers a vision, an argument, and some compelling solutions to bring us to our collective senses, before it's too late. Thinker, writer, and independent scholar Shawn Otto has written an important book called "The War on Science: Who's Waging It, Why It Matters, What We Can Do About It" (Milkweed Editions, publisher). Read this book now, and act on what you learn from it, for the sake of your own future and the future of our children and their children. The rise of modern civilization, from the Enlightenment onward for hundreds of years, was the same thing as the rise of modern science. It isn't that science itself is bad for powerful entities that make up the political and industrial status quo. Science is as essential today as it has ever been, or more so, to the owners of energy companies, the producers of military gear, the growers and purveyors of food, and so on. It is they who pull the wires which control the public mind. "Edward Bernays, 1928. The Great Fallacy of Scientists. For ideas on how to do this, they turned to the arguments developed by the postmodernist and religious wars on science, and merged them with new insights from the field of public relations. Propaganda. To understand the modern era of industry-funded antiscience, we have to first look at where it began: with the contribution of Sigmund Freud's nephew, Edward Bernays. Bernays was an Austrian-American journalist-turned-psychologist. He is widely credited as "the father of public relations," and is author of the seminal book in the field, Propaganda.
