Landscape Design with Plants, Second Edition focuses on landscape architecture. The book first discusses trees in the countryside. Adaptation to locality, self-town vegetation, designs for both short-term and long-term effect, ecological planting, and plant associations are described. The text looks at planting for forestry. The book underscores the use and management of plant species native to Britain in landscaping; urban landscape and roof gardens; and how to transplant semi-mature trees. The text also describes reclamation and planting of industrial and urban wastelands; landscaping of reservoir margins; and the relationship of plants and air pollution. This new and updated edition of Landscaping with Native Plants of Minnesota combines the practicality of a field guide with all the basic information homeowners need to create an effective landscape design. The plant profiles section includes comprehensive descriptions of approximately 150 flowers, trees, shrubs, vines, evergreens, grasses, and ferns that grew in Minnesota before European settlement, as well as complete information on planting, maintenance, and landscape uses for each plant. The book also includes complete information on how to garden successfully in Minnesota’s harsh climate.
