Ethics. Quite the same Wikipedia. Just better. Ethics or moral philosophy is a branch of philosophy that involves systematizing, defending, and recommending concepts of right and wrong conduct.[1] The term ethics derives from the Ancient Greek word ἠθικός, ethikos, which is derived from the word ἠθός, ethos (habit, "custom"). The branch of philosophy axiology comprises the sub-branches of ethics and aesthetics, each concerned with values.[2]. Ethics is the study of what is right or wrong in human conduct. This is a branch of Philosophy which studies moral principles. Hence, Ethics is also known as Moral Philosophy. Ethics vs Morals. Many people use the words Ethics and Morality interchangeably. However, there is a difference between Ethics and Morals. To put it in simple terms, Ethics = Morals + Reasoning. To have an ethical viewpoint, you should be able to give some reason for it. The field of ethics (or moral philosophy) involves systematizing, defending, and recommending concepts of right and wrong behavior. Philosophers today usually divide ethical theories into three general subject areas: metaethics, normative ethics, and applied ethics. By using the conceptual tools of metaethics and normative ethics, discussions in applied ethics try to resolve these controversial issues. The lines of distinction between metaethics, normative ethics, and applied ethics are often blurry.
