Description:

A groundbreaking approach to thinking about race and racism today.

Matthew Desmond and Mustafa Emirbayer, authors of *The Racial Order*, have written an undergraduate textbook on race relations for the twenty-first century. Every chapter of *Race in America* examines how racism intersects with other forms of social division—those based on gender, class, sexuality, ability, religion, and nationhood—as well as how whiteness surrounds us in unnamed ways that produce and reproduce a multitude of privileges for white people. Featuring a table of contents that is organized around race and racism in different aspects of social life, *Race in America* explores the connections between individual and institution, past and present, and the powerful and the powerless.

Race and ethnicity in the United States is a complex topic because the United States of America has a racially and ethnically diverse population. At the federal level, race and ethnicity have been categorized separately. The most recent United States Census officially recognized five racial categories (White or European American, Black or African American, Native American, Alaska Native, Asian American, Native Hawaiian, and Other Pacific Islander) as well as people of two or more races. Native Americans, which includes anybody with ancestry from North, Central or South America as well as Alaska, make up 1.6% of the US population. Prior to European colonization, Native Americans were the original residents of the present-day United States. Unfortunately, the arrival of Europeans meant new exposure to diseases, and often involve a violent outcome.
