Description:

From Four characterizations of the West contribute to the anti-Western stance Buruma and Margalit call Occidentalism and are used to justify attacking individual Westerners as less-than-human beings. The West prefers the sinful city to the virtuous countryside; the West destroys heroism and replaces it with trading; the West thinks only of matter and not of spirit; the West worships evil. Buruma and Margalit argue that the first two of those conceptions, typical of secular Occidentalism, are themselves Western, products of European romanticism that early-twentieth-century Japan and Germany exploited to their own ruin. The third idea informs Russia's long

struggle with the West but stems from German romanticism, in particular, with its sense of the wounded national soul. The fourth, peculiar to religious Occidentalism, animates radical Islamism but derives from the good-evil polarities of Persian Manichaeism that the young Augustine embraced. Buruma and Margalit conclude that these ideas' lives are "a tale of cross-contamination" that cannot be ended by answering anti-Western intolerance with more intolerance. A timely tract, brilliantly though broadly argued. *Ray Olson*

Clearly shows this hatred is primarily drawn from the intellectual west, especially the German romantics. The rise of free market economics along with the Protestant reformation, broke the uniform European culture.

"Twenty-five years after Edward Said's *Orientalism*, a whole field of study has developed to analyze and interpret the denigrating fantasies of the exotic "East" that sustained the colonial mind. But what about the fantasies of "the West" in the eyes of our self-proclaimed enemies? Those remain largely unexamined and, as Ian Buruma and Avishai Margalit argue, woefully misunderstood.". Interestingly, Buruma and Margalit find some of the roots of Occidentalism in the West itself. They highlight Marx's anti-capitalist thought, for instance, and the Nazis' anti-intellectualism; both components of Occidentalism, which fundamentally views the West as a soulless, mechanized purveyor of debauched. First Edition : False. Condition : Good. A profound investigation of the history of anti-Western stereotypes that traces them back to the West itself. Twenty-five years ago, Edward Said's Orientalism described the denigrating mirage of "the East" in the Western colonial mind. But as Ian Buruma and Avishai Margalit show in this book, "the West" is the more dangerous mirage of our time, and the idea of us in the minds of our self-proclaimed enemies is still largely unexamined and misunderstood. Occidentalism is their groundbreaking investigation of the demonizing fantasies and stereotypes about the Western world that fuel such hatred.
