If your child understands how to draw 9 simple shapes, they can draw a ton of things. I remember working my way through this book as a kid drawing the various creatures. These are great books for your young artist. Ed Emberley starts where most elementary-aged kids are at (stick figures) and brings drawing to the next immediate level of complexity. No shading, still just two-dimensional, but able to capture more of the world. Children tend to be very methodical and formulaic in their drawing--what they haven't seen others draw before, they tend to lack the imagination and talent to figure out (on their own) the technique for rendering it in a recognizable form.
