Do you remember when you were a little kid? Almost every child with toys had one similar thought. What would happen if toys could come to life? What if they came to life anyway when we didn't know? Maybe they only did it when we were sleeping or weren't home. After all, haven't strange things happened to you as a child? Did anything ever happen with your toys that you can't explain? In what may as well be *Illumination's* answer to *Toy Story*, *The Secret Life of Pets* imagines how domesticated animals behave while their owners' backs are turned, concentrating on a dynamic where newly adopted dog Duke (*Modern Family* star Eric Stonestreet, in the Buzz Lightyear role) disrupts the balance in a household where Max (Louis C.K., as the Woody equivalent) had previously been his human's best friend. Though Max's friends regularly stop by his apartment to hang out while Katie's away for the day, Gidget's the only one who actually notices his disappearance, mobilizing a citywide search to find the pooch she wants to smooch.

Secret Life of Pets has less of a thematically-layered narrative and emotional depth than any of the Toy Story movies released to date, but helps to make up the difference through its storyline's sheer forward momentum - not to mention, the giddy pace at which it throws jokes at the wall, most of which stick the landing. Nevertheless, there are scenes where Secret Life of Pets could be more emotionally resonant and dramatically impactful, had it slowed down for additional plot/character development. But their fears melt away when they end up at the Little Girl's school, where she proudly displays her best friends in the world at show and tell. Harrowing experience turns out just fine. Each chapter has Important Life Lesson written all over it, but the lesson is delivered with so much humor that it never seems preachy. Plastic, the beach ball, has a self-esteem crisis when she reads in a dictionary that she is artificial, which means fake not natural. By contrast, the toys in two picture books, Oscar and While You Are Sleeping, are more service-oriented in their secret lives. They pull their children's blankets up at night and generally make sure things go smoothly. Like parents, they do what needs to be done. Naturally, they aren't nearly as much fun. Like Toy Story, we have a pre-established society where pets call the shots. On top of that, we have a main character named Max who is used to getting all of the attention from his owner, exactly like Woody and Andy's relationship in Toy Story. The inciting incident appears to be the adoption of a new pet who steals the attention away from the favorite, who is Max in this case. Then the two of them get lost and have to find their way home, resolving their differences along the way. They both bail out the main characters when they're in trouble (Lots-o' Fun provides a new way of life for the toys, and Snowball rescues Max and Duke from Animal Control), only to thrust the heroes into an even worse scenario. Of course, thoughtful borrowing can lead to great movies. Secret Life of Toys. From Wikipedia, the free encyclopedia. Secret Life of Toys. Genre. Children's television series.
